

## Dolly Loader

ECS Engineering's Dolly Loaders provide an accurate and flexible stacked basket handling solution.

The standard machine can load single dollies, double dollies and directly to the floor.

The ECS Engineering Dolly Loader can be supplied as a stand alone unit or integrated with the ECS Engineering Pattern Former/Basket Loader and Basket Stacking machines.

Stand alone units feature an Allen Bradley Compact Logix Processor and an Allen Bradley Panelview Plus Operator Interface. Lift and conveyor motors are SEW Eurodrive and pneumatics are SMC.

Integrated units feature the same high quality components, however the processor and operator interface are housed in the Pattern Former/Basket Loader.

### Key Features

- Stainless steel construction
- Laser guided placement system
- Single machine suits wide range of dolly configurations
- Small footprint
- Stand alone or integrated with ECS Automated Package Handling line
